EDUCATION

B.Sc. in Industrial Engineering & Management | Afeka College **2024 - 2028**

Relevant Coursework: SQL, Python (OOP), Algorithms & Data Structures, Statistics and Statistical Inference, Operations Research and Optimization, Process Analysis and Modeling, Information Systems.

PROJECTS

Voice of Customer AI Copilot | Independent Product & AI Project | View Project

- Designed an AI-assisted workflow to transform unstructured customer feedback into structured product insights.
- Built a feedback classification process using Python and an LLM, categorizing feedback by theme, type, sentiment, and severity.
- Evaluated classification quality through prompt experiments and a separate holdout test set.
- Developed a prototype workflow linking AI-generated insights to original customer feedback, supporting traceable and evidence-based product analysis.

Pharmaceutical Production Line Analysis | Academic Project – CTS

- Conducted a time study of a pharmaceutical packaging line at CTS and analyzed production measurements in Excel.
- Calculated operational KPIs, including cycle time, throughput, and resource utilization, and identified the primary production bottleneck.
- Evaluated process-improvement alternatives and presented data-driven recommendations to increase production capacity.

EXPERIENCE

Social Media Manager | The Cooking Studio **Sep 2023 - Dec 2025**

- Managed the business's social media platforms and created content for digital channels.
- Designed and published marketing content tailored to target audiences.
- Monitored content performance and analyzed engagement metrics to improve results.

Customer Service Representative | Harel Insurance **Jan 2022 - June 2022**

- Handled customer inquiries and requests in the health insurance field.
- Used internal information systems and databases to provide customer support.
- Coordinated with relevant departments and followed up on customer cases through resolution.

MILITARY SERVICE

Command & Control (C2) Systems Instructor & Course Commander **Nov 2019 - Dec 2021**

- Planned and coordinated training schedules, resource allocation, and certification processes.
- Led and guided a team of instructors, assigning responsibilities and providing professional support.
- Managed training programs and commanded an instructor training course.
- Coordinated with officers and operational units to meet organizational requirements.

TECHNICAL SKILLS

- **Data & Programming:** Python (Pandas), SQL, Microsoft Excel (Advanced- Pivot Tables, Formulas, Data Analysis & Visualization)
- **AI Tools:** GitHub Copilot, OpenAI Codex, Claude Code
- **Other Tools:** Microsoft PowerPoint, Adobe Illustrator, Adobe Premiere Pro
